

# GEOCACHING

## AT MORRIS ARBORETUM

There are 3 caches on the property. The coordinates listed below will lead you to a location *near* the hidden cache, and then you will use the clues provided, to pinpoint the exact cache location. At Morris Arboretum, plants are our prized possessions, so no cache will ever be located where you'll have to climb a tree, or walk through mulched areas to reach it.

Once the cache is found, please feel free to sign the log, and remember to return the cache and all contents to their original location, so others may find it. ***Good Luck!***

### From One Keyhole to Another

GPS Coordinates: N 40° 05.133 W 075° 13.383

The coordinates given are for a well-loved water feature, but the cache is located inside a hidden water feature. From the paved path facing the keyhole in the ground, look south and another keyhole can be found.

### Spines and Schist

GPS Coordinates: N 40° 05.233 W 075° 13.100

Through spine and needle the stairs do go,  
Your way is followed by eyes kept low.  
At base of wall all schist composed,  
You'll find this cache in wooden repose.

### Forever Green

GPS Coordinates: N 40° 05.321 W 075° 13.222

In this little clearing, prickly Sweetgum balls abound.  
Look high, look low, then go where their source can be found.

With this tree's copper tag at your back; survey the scene.  
Go to the sap and find this cache in a snap.  
Hint: look for evergreen.

So sorry little bird. This house is not for rent.  
For cacher's discov'ry is it's only intent.
